

Enterprise Resource Planning (ERP)

Plex Online offers comprehensive **Enterprise Resource Planning** functions for every department within a manufacturer.

Plex Online takes you beyond the limitations of legacy, on premise ERP systems. Speed implementations, avoid complex upgrades, and achieve a fast return on investment with the Software as a Service model. The true value of Plex Online is the comprehensive coverage of all manufacturing and business processes, captured in real-time at their point of origin.

#1 Rated ERP Solution for Manufacturers

Accounting

Seamlessly link the entire enterprise. Supplier Receipts create AP records. Customer shipments create AR records. Your accounting staff can focus their effort on analysis and follow-up rather than data entry.

- Accounts Payable
- Accounts Receivable
- Budgeting
- Costing
- Financial Statements
- General Ledger
- Inventory Valuation
- Multi-company Financial Consolidation

Business Intelligence

Improve business decision making by using fact-based support systems such as query and reporting, online analytical processing (OLAP), statistical analysis, and other tools.

Because Plex Online is an online, real-time information system, the entirety of Plex Online software fulfills the vision of Business Intelligence.

- Standard, Custom Reports
- Ad Hoc Query
- Key Measurables

Computer Aided Design (CAD)

CAD formats are managed and controlled through the Plex Online Drawing Management System / Document Control System. Plex Online integrates with CAD software in a variety of ways.

- Document Control System
- CAD Integration
- Universal Attachment System

Costing

Plex Online tracks and records all physical events (receiving, production, inventory status changes, scrap, subcontract, shipping, etc.) on the shop floor, making it ideal for tracking cost.

- Actual Costing
- Advanced Standard Costing
- Cost Setup
- Inventory Valuation - Standard Cost
- Job Costing
- Part Cost Structure

Document Control System (DCS)

Store, edit, distribute, and manage documents online. It includes many features ideal for ISO, TS, QS, and other standards.

- Document Imaging
- Multiple Methods for Adding Files to the Control System
- Online Supplier Management System Integration
- Universal Attachment System (UAS) Integration
- Workflow Module Integration
- Electronic Approval System
- Full Electronic Distribution
- Revision Tracking System
- User-Defined Champions and Groups
- User-Defined Hierarchical Directory Structure

E-Commerce

As a full-featured and comprehensive Internet-based application that interconnects manufacturers with their suppliers and their customers, the Plex Online system fulfills the vision of E-Commerce in all its many forms, ranging from online orders and shipping, to inventory tracking and on-line supplier management.

continued on back.

Enterprise Resource Planning (ERP)

- Customer Module
- Online Order Inquiry

- Cross Company Integration

Groupware/ Communication

The Plex Online information system provides a shared, online database that all employees can draw from to make decisions and perform their job functions.

- Activity/Task Manager
- Broadcast E-Mail
- Bulletin Board
- Calendar
- Checklist System
- Contact Management
- Forum
- In/Out Board
- Issue Management
- Key Measurables
- Team/Group Setup
- Visitor Log
- Workflow

Human Resources

Employee List stores all the pertinent information about each employee. The fully-integrated Time and Attendance module feeds information to the cost tracking system, and supports the down-loading of hours data to payroll services.

- Employee List
- Manufacturing Masters
- Positions & Job Descriptions
- Visual Employee List
- Discipline Tracking System
- Employee Records
- Injury Tracking
- Health/Safety Incident Tracking
- Training Tracking
- Skill Matrix
- Grievance Log
- Employee Expense Tracking
- Disclosure Log (HIPPA)
- Employee Suggestion System
- Employee Review Priority List
- Badge Printing
- Employee Reimbursements
- Work Calendar
- Time & Attendance Labor Tracking
- Timeclock Payroll Interface
- Team/Group Setup
- Labor Activity Tracking

Inventory Control

A powerful and highly-detailed Inventory Tracking System is ideal for real-time tracking of containers, pieces and/or assemblies as they move through the manufacturing process on the shop floor.

The simple, easy-to-use interface is designed for shop floor personnel

- Inventory Tracking
- Serialized Individuals Inventory
- Advanced Parts Traceability & Product Genealogy
- Physical / Cycle Inventory
- Subcontract Shipping/Receiving
- Customer/Consignment Inventory
- Heat Traceability
- Lot Tracking
- Scrap Tracking

- Rejection Tracking
- Container Types
- Returnable Container Tracking
- Inventory Location List
- Production Tracking
- Control Panel
- Job Tracking System

Product Data Management

The integrated Product Data Management (PDM) system manages part numbers, revision levels, part specifications, manufacturing routings, Bill of Materials (BOM), Document Control, CAD Drawings and other data relevant to a product.

Plex Online is CAD-package neutral, and is highly integrated into the manufacturing system and the company as a whole, rather than the CAD system itself.

- Program Iterations
- Program Manager

Program Management

Plex Online integrated Program Management manages the internal complexities of launching new products, conducting R/D projects, and handling major revisions.

Highly-integrated with the Checklist System, APQP, the Workflow Module, and other Plex Online modules, the Program Management System makes sure all the necessary tasks get done.
