

Plex by the Numbers Implementation

Our Customers Talk About Implementation from the Plex Manufacturing Cloud

An ERP solution is no solution at all without a successful implementation. And by successful we mean a project that goes live; a project that thrives, is widely adopted by employees, positively impacts your business and pays for itself – fast.

We're going to let our customers tell you about their ERP implementation experience in the Plex Cloud. Here's what they have to say – strictly by the numbers.

0 business disruption

Because the system is so intuitive, on-the-floor training was quick and highly effective. The implementation didn't disrupt our business and employees in all departments are now able to access and use information to perform their jobs effectively.

Clips and Clamps Industries

35% of scheduled orders shipped on first day of Plex implementation

Even though the schedule was tough, with the Plex Cloud we were able to ship about 35 percent of our scheduled orders on the first day and we continued to improve our performance to schedule every day. We were pleased to have an ERP launch with minimal production issues.

Cast Aluminum Solutions

Plex by the Numbers Implementation

5 months

We felt so confident with the process that we bumped up the launch date by two months

Howard Hauser, Operations Vice President, Hiawatha Rubber

3 months

Weber set up an implementation schedule, starting with the Purchasing and Quoting modules, features that would offer them the greatest return for the time invested. Once the entire core package was programmed, Weber went live only one month later for a total implementation time of three months.

Weber Metals, Inc.

14 locations in **12** months

The speed of this launch was especially remarkable given the complexity of integrating data from many different locations.

Dennis Hodges, CIO, Inteva Products LLC

6 months

Jagemann Stamping Company implemented Plex in less than 6 months with no production disruptions. Their IT staff now works on more strategic, value-added functions.

Jagemann Stamping Company

120 days

Bhar was up and running with the Plex Cloud within 120 days.

I would describe our implementation of Plex as very smooth. The integration and training were great. Overall, the transition to Plex was almost seamless

Melissa Smith, President, Bhar

60 days

ByTec implemented the Plex Cloud in **less than 60 days**. The Plex Cloud now handles all manufacturing lines and manages all aspects of ByTec's business – from shop floor to top floor.
