

# IT is spinning its wheels in automotive manufacturing

Automotive manufacturers face many challenges: regulatory compliance, risk of recalls, dynamic market conditions—to name a few. For IT, the task of keeping the business nimble is often hindered by costly, disjointed hardware and software that:

- > *Obscures visibility*
- > *Inhibits collaboration*
- > *Lacks scale*
- > *Wastes resources*

But your savvy competitors have found a better way to meet these challenges. The Plex Manufacturing Cloud is a versionless cloud ERP solution that automates and simplifies IT's daily tasks - freeing resources to address bigger business issues.

*Here are some of the results our customers are seeing:*

From **MINUTES** to **SECONDS**

Traceability went from 30 minutes or more of pulling data from three systems, to a few mouse clicks from one system.

**100%** of Data Captured Digitally

“  
What [Plex] gives us is real confidence in the processes we are running, the accuracy of the data we are capturing, the visibility of our operations, and the quality of products we are creating and shipping to customers.  
”  
TECHNICAL SERVICES MANAGER,  
CALTHERM

**1** Source of Truth

Clips & Clamps Industries replaced six disparate systems with a single integrated ERP from Plex Manufacturing Cloud.

**30%** Improvement in Operational Efficiency

“  
We are now in a good position for the future. Our revenue continues to grow, our systems are strong and we continue to expand the role of Plex within the company.  
”  
DAN JANUSZEK, ASSISTANT GM,  
MFC NETFORM

Plex delivers a manufacturing operating system with versionless software to improve IT operations. Unlock continuous improvement, access better business analytics, and develop strategies that move the business forward — no software updates needed. With configurable capabilities, cross-operational visibility, and real-time insight into critical data, Plex empowers teams for operational excellence, from the plant to the back office.
